About Me

Experienced Business Analyst and Quality Engineering Analyst with over 10 years in the Insurance domain, specializing in Business Requirements Gathering, System Integration Testing, Regression Testing, UAT Support, PMACS Testing, and Callidus Testing throughout the Software Testing Life Cycle (STLC). Proficient in test case generation, requirement traceability, and defect management, with a strong foundation in Agile methodologies. Certified in Data Analytics and Generative AI (IIT Guwahati), I leverage AI tools such as Claude, GitHub Copilot, Microsoft Copilot, and Ask ROVO, alongside Python, SQL, and Tableau, to automate processes, analyze large datasets, and drive data-informed business decisions. I possess a proven track record of process automation, client-facing leadership, and have received multiple industry recognitions for project execution excellence.
